

ALKI

meyer wells
ART FROM WOOD

alki collection

The Alki Table is the result of a creative dialog between modern art and contemporary design. Inspired by sculptures of Western and African descent, the table is both playful and aesthetically pleasing. The asymmetrical shape entices our natural conception of beauty and balance. The sculptural silhouette of the base moves the eye, allowing different takeaways with each vantage. The minimal footprint affords its users flexibility as a comfortable side table, a convenient sofa work surface or a stand alone piece. The Alki Table is a perfect companion to the continuously evolving home and workspace of today: flexible, mobile and, as with all our pieces, quality crafted.
