ART FROM WOOD

narada table

Our Narada Table offers more than meets the eye with its fluid design and hidden talents. The silhouette is clean while also packing a comfortable visual weight - a paradox that makes this piece at home in a myriad of designs. The mitered waterfall edge moves the eye from leg to leg, keeping one's focus on the grain's naturally flowing pattern. Concealed wire management, hidden within a discreet plywood channel, continues the dedication to uninterrupted movement while also providing users with access to data and charging capabilities. Whether working the space as a focal point or blending seamlessly into the world around it, our Narada Table is a quality-crafted work of useful art from wood.

narada table

Our Narada Table as a study in form and function. The fluid lines move the eye; the clean footprint allows a seamless integration into the environment; and the hidden channel offers concealed wire management.

Standing height version shown in Maple with Portobello finish and two COHV1 data units

NARADA TABLE

Solid wood top with waterfall edge wood slab legs and plywood channel running interior of one leg

SIZES

| | |
|---------|-------------------------|
| LENGTH: | 60" - 240" |
| WIDTH: | 36", 42", 48", 54", 60" |
| HEIGHT: | 30", 42" |

DETAILS
